

CTA CIRCLE LINE ALTERNATIVES ANALYSIS STUDY:
Final Summary Report

Given the various and lengthy number of reports and public documents produced during the Circle Line study period, a Final Summary Report was produced to provide a streamlined chronology of events and findings throughout the life of the project.

Condensed information in the report comes from the Screens 1, 2, and 3 documents, as well as the Purpose and Need, Strategic Program of Projects, and LPA reports.

The document was written in a polished, non-technical style intended for a broad audience. It provides key findings and describes the timeline of the project using a diverse assortment of graphics including tables, graphs, maps, photos, diagrams, and flowcharts.

Vlecides-Schroeder Associates, Inc. (VSA) produced all written materials for this report.

Project Completed: TBD
Client: CTA
