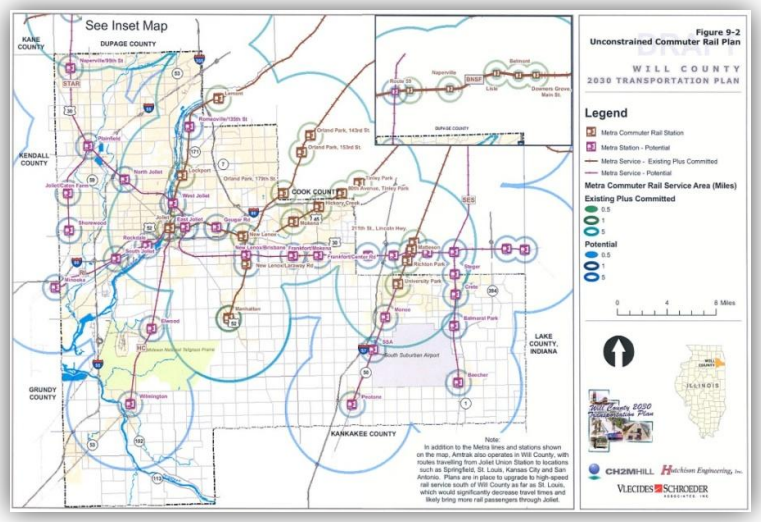
WILL COUNTY TRANSPORTATION STUDY



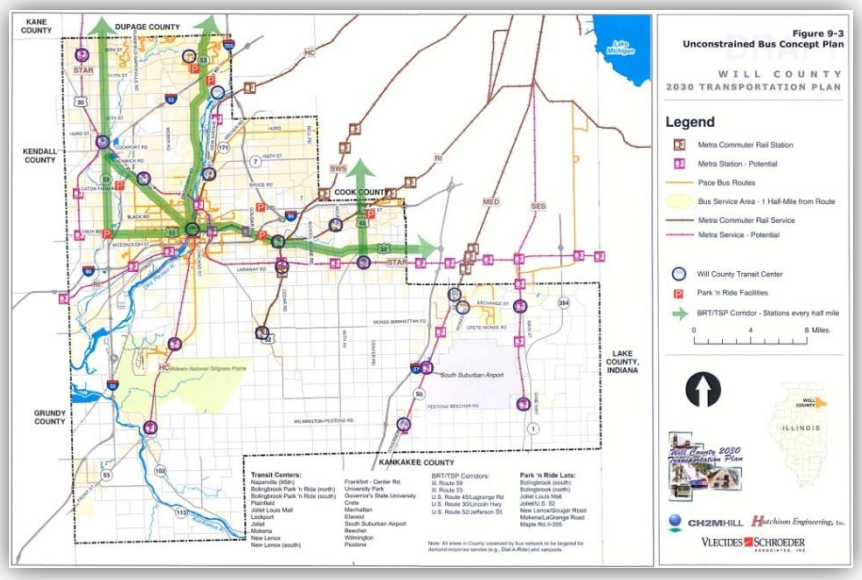
Unconstrained Commuter Rail Plan

Will County is one of the fastest growing counties in the U.S., with a population that is projected to more than double to over 1.1 million residents by 2030. To accommodate this extensive growth, and to support an orderly growth process, Will County Department of Highways developed a long range transportation plan, adopted in 2009 by the Will County Board.

Coordination with regional plans and public and local officials was an important part of the process.

Vlecides-Schroeder Associates, Inc.'s role in this project was to develop the transit, bikeway and pedestrian elements of the plan. A key component of the plan was to provide for rail access to the proposed Peotone Airport, either via extension of the Metra Electric line or the proposed Metra SE Service.

Project Completion: 2009
Client: Will County Highway Department



Unconstrained 2030 Transit Plan
